IR grejalice najnovije dostignuće u oblasti infracrvenih zraka

- Imaju sposobnost emitovanja ogromne količine trenutne toplote uz maksimalnu uštedu električne energije, čak do 60%.
- Trenutna toplota se stvara već u prvoj sekundi nakon uključivanja.
- Vodootporne su i mogu se koristiti u eksterijerima podjednako kao i u enterijerima.
- Aparati imaju mogućnost pričvršćivanja na najrazličitijim predmetima, te tako daju mogućnost ciljanog, usmerenog grejanja.
- Automatski regulator daje mogućnost paljenja po potrebi, isključujući mogućnost rasipanja toplote u etru bez same potrebe.
- Ekološki su pogodne, ne zagađuju okolinu, a usled povoljnog uticaja na ljudski organizam, svoju primenu su našle i u medicini.

Upravo iz ovih razloga IR grejalice su našle primenu i u zagrevanju objekata iz HORECA sektora. Grejalice su testirane i poseduju sve neophodne sertifikate.
